

Android Business Pad

BP70

- ✓ IP65
- ✓ 10.1"

Experience The Future for Your Business.

The recent chemistry experiment has gone right in the lab. Android 4.0 was properly mixed with the enterprise level mobility, security, connectivity and peripheral features. With the BP70, game changing business pad with the most popular consumer platform, business will never be the same.

KEY FEATURES & BENEFITS

Durability and Design: Very Tough yet Elegant Enough

For the BP70, elegance does not mean frailty. To everyone's surprise, this elegant-looking business pad is rated IP65, and has passed 2.7 ft./0.8m drop tests. Not only that, the BP70 lasts spills and extreme temperatures both hot and cold. With its durability and design, the BP70 is the right answer for enterprise.

Display: Top Notch Quality View for You

The BP70 presents the most user friendly display with its 10.1" sunlight readable screen with capacitive touch. You can now properly view the screen without seeking for shades. The high-resolution IPS display allows you to access your vital contents in any angle. The BP70 brings the top notch quality view just for you.

Multiple Users: Share like a Spare

Limited in quantity, devices are to be shared amongst individuals in various positions. The BP70 has figured out who uses what. For each and every logged on user, it is personalized to suit different roles and responsibilities. The device quantity may be limited, but this does not affect the quality of your workforce.

Security: Reliable like a Stonewall

Security is the last thing you want to compromise. With that in mind, the BP70 comes equipped with security features like data encryption to protect your proprietary information. Your business intelligence is stonewalled; keep your daily operations secure with the BP70.

Battery: All Day, Every Day

Normally, switching a battery may not be a big deal, but for busy field workers, it can be a real pain. Moreover, when mission critical data is lost due to battery out of place, the device owner is basically doomed. The BP70 helps eliminating concerns for this unexpected happening. Thanks to its hot-swap battery, the BP70 will be keep running even when you need to switch the batteries. Timeless power supply; Use all day, every day.

Enterprise Peripherals: Add and Subtract

The BP70 comes with a set of optional enterprise peripherals. MSR may translate into mobile point of sale and line busting applications. Barcode scan module enables swift and efficient inventory management. IC card reader enables secure access control and workforce management. With NFC module, one can make contactless payment and store vital information. For the longest time, Bluebird has made its name for customization. The brand new BP70 carries on this fine tradition. Just add what you need and keep your TCO low.

Device Management: All Under Control

What if your field worker loses the device? What if the users need an urgent update in the field? Bluebird's MDM software provides a truly global answer for these questions. Location is no concern; the BP70 may be monitored, updated, staged, and if necessary, disposed of no matter where it happens to be.
